

Truck Management Guide

Overview

Administrators can manage trucks and carrier in SOP for reporting. Administrators have a button navigation at the top of the dashboard to manage plants, pavers, trucks, and accounts.

Trucks

Clicking the 'Trucks' button displays a list of trucks used by the company. Administrators can add details and edit a truck as needed.

Trucks [Manage Truck Owners](#)

| Cab ID | Company | |
|--------|------------|-------------------------|
| AJ50 | SOP Paving | DETAILS |
| AJ658 | SOP Paving | DETAILS |
| AJ24 | SOP Paving | DETAILS |

Truck Details

Truck Number

Carrier

Make/Model

License Plate

BlueTooth Tag Number

[UPDATE TRUCK](#)

Add/Edit Truck

Trucks are automatically created from the plant scale software, or they can be added manually.

When adding or editing a truck, users can assign the truck to a carrier and add make/model, license plant, and Bluetooth Tag Number for BLE Automatic Unloading.

Carriers

To add and manage carriers, use the Carrier button at the top of the truck page. From the Carriers list, users can add and edit carrier details, which can then be assigned to trucks.

Carriers

[ADD CARRIER](#)

| Company | Contact Name | Contact | Actions |
|------------|--------------|---|-------------------------|
